The attached sketch shows a railroad construction project at Eberswalde, on which work has been started. When completed, the connecting line shown as being under construction will make it possible for trains between Frankfurt/Oder and Templin or Szczecin to by-pass the Eberswalde station. About 2,000 men were employed at the project. The target date for completion, on which the Russians strongly insist, is 21 December 1951. 50X1-HUM
